Project Management

# Manoj Bhatt

Senior Backend Developer(Python) & Team Lead at NAXA  
Bāgmatī

## Summary

I am an Engineer at heart, passionate about developing solutions that matter. Experienced Web Developer with knowledge of building large-scale logistics applications, developing and deploying restful APIs in Django. Python is my weapon of choice but I believe a language is just a tool and any tool can be learned when required. Besides web development, I am hugely interested in Artificial Intelligence and continue to practice it in my off-time. I also have experience working in e-commerce software in WordPress and ERP software in Zoho.

I carry honesty as my core principle and try to build a calm and organized personality. I am always eager to interact with people who believe in learning and sharing knowledge. I believe the aforementioned traits help me to improve myself as a human being and go along well with people to become an efficient team player.

---

## Experience

### NAXA

2 years 3 months

#### Senior Backend Developer & Team Lead

November 2021 - Present (9 months)

Kathmandu, Bāgmatī, Nepal

- Conceptualizing and implementing project backend and database architecture.
- Leading a team of backend developers working across several projects to ensure quality and efficient development pipeline.
- Attending regular meetings with the project management team to understand software requirements and ensure accurate implementation.
- Writing scalable and efficient Restful APIs for various data collection and visualization web apps.
- Continuously learning and experimenting with new libraries/codebases to improve current tech stack.

## Backend Developer

May 2020 - November 2021 (1 year 7 months)

Kathmandu, Bāgmatī, Nepal

- Architecture Design: Design project and database architecture from scratch and implement it.
- Restful APIs: Developing scalable and efficient Restful APIs for various data collection and visualization web apps.
